[Phone Price](#)

[HTC Mobiles](#)

Samsung has launched its latest Samsung Monte for smart phone lovers. It is a touch screen mobile that has been recently released specifically for middle class customers. When compared with other latest 3g phones, Samsung Monte is very cheap in price. It costs only Rs. 8,850 approximately and is now available in all major stores. Samsung has specifically designed it as a budget phone making it affordable for all classes of people who like to enjoy latest model designer phones at low rates.

Samsung Monte is a 3g phone with all important features included. Samsung Monte S5620 uses a Li-ion battery with a capacity of 1000mAh. The battery time offered by Samsung Monte S5620 is 42 minutes of talk time and 9 hours stand by time. The main platform that is used by Samsung Monte S5620 is TouchWiz UI and has a built in memory of 227MB integrated memory. The memory of the mobile is expandable through microSD card slot and can be expanded up to 16G.

Samsung Monte S5620 is a bar phone with touch screen display that is 3 inch WQVGA TFT capacitive touch screen and its resolution is 240 x 400 pixels. This is a very light weight phone that weighs only 92 g. This makes the mobile easy to use and handle. Samsung Monte S5620 includes a 3 mega pixel camera that can fairly be used to take good quality pictures. It also includes the Smile Shot feature that is found to be interesting. Video recording at the rate of 15 frames per second is possible and there are also options to make video call. The major connectivity that are supported include Wi-Fi, GPS receiver with A-GPS, Bluetooth 2.1 with A2DP and audio jack. FM radio with RDS is available and social networking is possible through major social networking websites like Facebook, MySpace and Bebo.

extensively use the messaging options. Other internal features of both these models released by Sony Ericsson are the same. The 2G network capacity of Sony Ericsson Xperia X10 Mini Pro is GSM 850/ 900 / 1800 / 1900 and that of 3G network is HSDPA 900 / 1200 and HSDPA 850 / 1900 / 2100. Sony Ericsson Xperia X10 Mini Pro weighs 120 g and uses a TFT capacitive touch screen with 16 million colors. The size of the display screen is 2.55 inches and the resolution is 240 x 320 pixels. Unlike Sony Ericsson Xperia X10 Mini that has only the touch screen, Sony Ericsson Xperia X10 Mini Pro also includes a slid out QWERTY keyboard that is scratch resistant. Along with it comes an accelerometer sensor for UI auto rotate and a timescape UI as well.

Sony Ericsson Xperia X10 Mini Pro uses a Qualcomm MSM 7227 600 MHz processor and has an internal memory of 128 MB and can be expanded up to 16 GB through microSD. Sony Ericsson Xperia X10 Mini Pro runs on Android operating system 1.6 and supports MP3 ring tones, SMS, MMS, other email communications through Push Mail and IM.

The cost of Sony Ericsson Xperia X10 Mini Pro is Rs. 17060 and Sony Ericsson Xperia X10 Mini is available at the rate of Rs. 15,695. Other additional features include A-GPS for easy navigation and supports JAVA applications. Sony Ericsson Xperia X10 Mini Pro includes a 5 MP camera with auto focus and LED Flash. It also comes with Geo tagging and video recording at the rate of 30 frames per second.

Motorola BackFlip India Is Now Available In India At Cheap Rates

 August 9th, 2010  3gmobiles

Motorola Backflip is a recent release from Motorola and is now available in India. Motorola Backflip is a very stylish and unique model phone in which the QWERTY keyboard smoothly folds behind the high resolution screen. The mobile has an excellent touch screen in the front through which the users will easily be able to navigate through the system. The touch screen of this smart phone is capacitive and the phone weighs 133g and is easy to handle. Motorola Backflip includes a full QWERTY keyboard that includes side keys.

Motorola Backflip includes 5 MP camera that helps in capturing high resolution videos. Moreover, as the phone also includes features like auto focus with LED flash and geo-tagging, it becomes even more easier and comfortable for users to use the camera for shooting. The display of the phone is 3.1 inches and has a very good resolution of 320 x 480 pixels. The phone supports MP3, WAV and eAAC+ files for playing music and as the phone has speaker option as well, it is much more easier of playing music tracks. Other than being a 3G phone, it also supports Edge, GPRS and HSDPA. Depending on how the phone is held, the signal will change from 3G to Edge. Other connectivity that are supported include Wi-Fi 802.11 b/g, Bluetooth and microUSB v2.0.

Motorola Backflip is platinum silver in color and the operating system that it runs in is Android 1.5 and can be upgraded up to 2.1. The memory capacity of Motorola Backflip is 2 GB but has a memory slot through which the memory can be upgraded up to 32 GB through microSD. Motorola Backflip uses a 1400 mAh Li-ion battery that gives a talk time of 6 hours and stand by time up to 315 hours. All this in India is available for Rs. 19,490 and is available in all leading stores.
